
We're simplifying the way you order pathology

AUSTRALIAN Clinicalabs

Don’t waste time filling in form fields

Making the process easier

As leaders in medical technology, Australian Clinical Labs are always looking for ways to make the pathology process quicker and even more accurate.

This is why we are introducing a simple, yet more intelligent eOrder application. This new automated system will save you valuable time when ordering pathology by:

- **Intelligently predicting your ordering patterns.**
- **Tailoring your favourite test combinations.**
- **Suggesting further test combinations based on the latest medical specialist recommendations.**

Data shows that:

90% of doctors only used

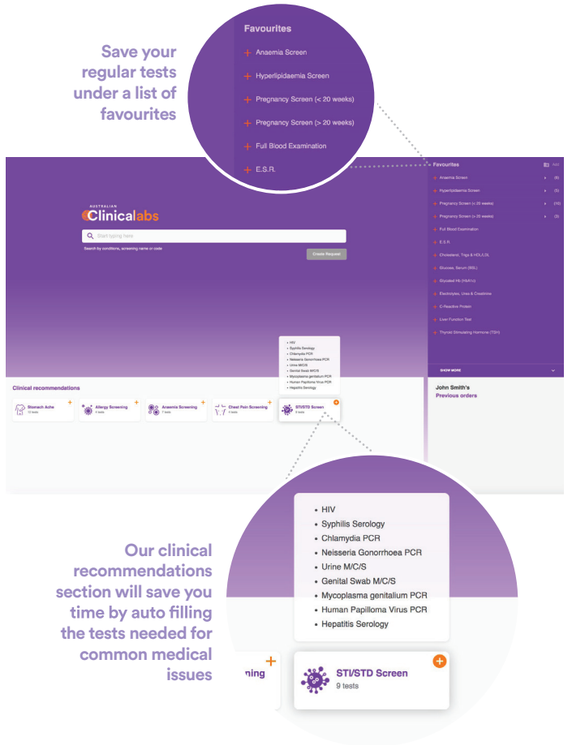
5% of the current Medical Director Pathology request form

Similar to the way Google simplified their search engine experience, we have designed the eOrder application so you won’t waste time filling in form fields - instead, allowing you to quickly order the test you want and spend time it where it’s needed most, with your patients.

A better outcome

The new eOrder application works seamlessly with your current Medical Director system, removing the need for manual data entry, making the process even more accurate.

This will result in a faster turn around for your requested pathology tests and a smoother process.



The new eOrder application is easy to set up

Before proceeding please ensure your practice server is on Medical Director version 3.18 or later.

Step 1. **Check that Australian Clinical Labs (or one of its aliases or past trade names) are in your address book.**

Step 2. **Set Australian Clinical Labs eOrders as your ‘default’ choice for Pathology.**

Step 3. **Launch the new eOrders application!**

Or call **1300 669 961** and we’ll set it up for you.
