

Environmental Water Testing

Setting the benchmark for excellence

Our specialised laboratories have been providing tailored Environmental Water Testing services for organisations across Australia for over 30 years – performing over 55,000 water testing episodes annually.

At Clinical Labs we offer testing for the following types of water sources:

- **Industrial waters** (e.g. cooling towers, evaporative coolers, ice)
- **Potable waters** (e.g. spring, rain, bore, dam, drinking waters)
- **Recreational waters** (e.g. spas, pools, baths, fountains)

Clinical Labs delivers a seamless, rapid service to our clients within the legislated 24-hour deadline. Our environmental water testing laboratories screen samples for:

- Legionella (Legionella pneumophila and Legionella spp.)
- HCC or Total Plate Count
- Coliform and E.coli testing
- Pseudomonas aeruginosa
- Thermotolerant coliforms

Call our Commercial Team on 13LABS (13 52 27) or email commercial@clinicalabs.com.au, and we'll help you find a tailored Environmental Water Testing solution that's right for your organisation.

Why choose Clinical Labs for your water testing?

✓ Leaders in science

As a major pathology provider, Clinical Labs is in a unique position to provide a superior testing service – all testing and analysis are conducted in our state-of-the-art, NATA-accredited Environmental Water Testing Laboratories in Clayton (Vic), Bella Vista (NSW) and Adelaide Airport (SA). Our laboratories are staffed by a highly skilled team of RCPA-accredited pathologists, scientists and laboratory technicians.

✓ Superior logistics

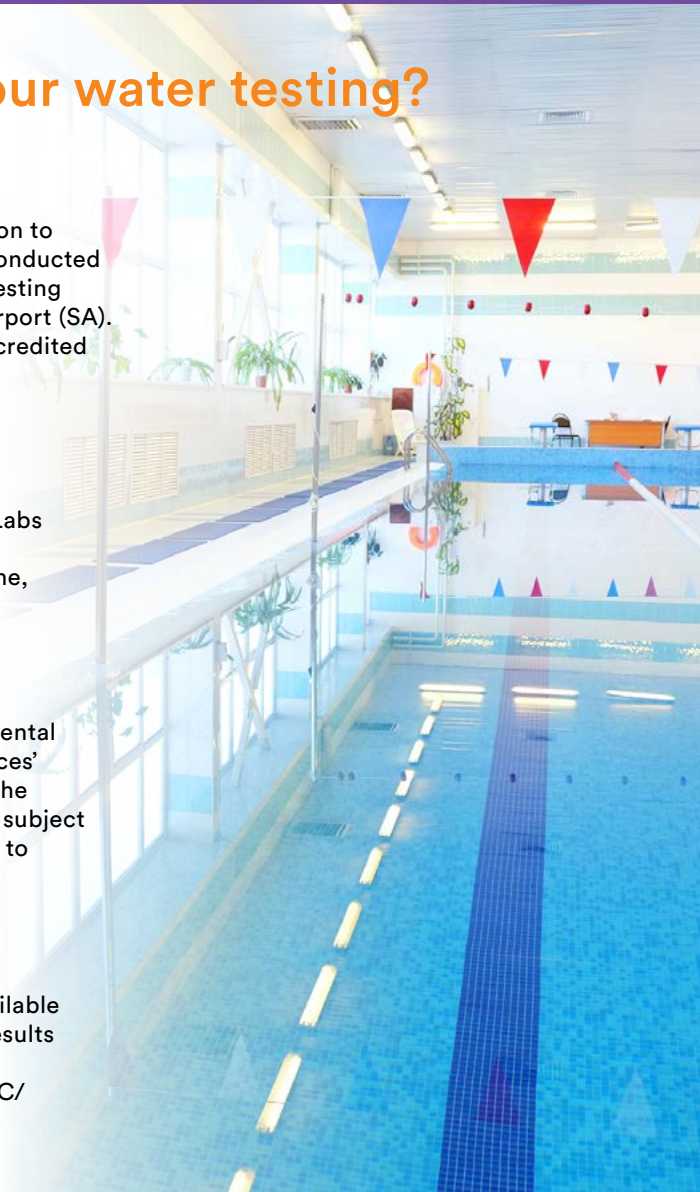

Our collection centres are strategically located for easy sample drop-off and pick-up by our extensive courier network. Clinical Labs can accommodate all intrastate and interstate transport needs, ensuring testing is performed well within the necessary timeframe, regardless of sample collection location.

✓ Quality assurance

Clinical Labs holds all required NATA accreditation for Environmental Water Testing and successfully participates in IFM Quality Services' proficiency testing scheme, ensuring all staff are performing to the highest quality standards. As water and environmental testing is subject to changing and differing state legislation, we are well equipped to manage changes in testing requirements if and when required.

✓ Easy-to-access results

We offer a secure online portal to access results. The data is available on our simple-to-use platform where all active and past results can be viewed, downloaded and printed. Simply visit [eresults.clinicallabs.com.au/watertesting](https://www.clinicallabs.com.au/watertesting) to view your results. High HCC/ Legionella results notification can be provided via email and/or telephone to the relevant state business office if required.

About Australian Clinical Labs

Australian Clinical Labs is one of the largest pathology providers in Australia, with our laboratories performing close to 8 million episodes a year for a range of referrers including doctors, specialists, patients, hospitals and corporate clients.

Along with providing routine and specialised pathology tests for our GP and specialist referrers, we offer commercial pathology services for companies, occupational health and safety providers, consultants and government bodies.

The following Commercial Pathology Services may also be of interest to your company:

- Pre-employment Screening
- Drug and Alcohol Testing
- Employee Health Screening
