

Collection of Semen for Fertility and Post Vasectomy (NSW/ACT)

EQUIPMENT

- 1x 70ml Yellow-top Container
Available from any Clinical Labs collection centre or your doctor.

Procedure

- 2 days prior to the test, abstain from all sexual activity.
- Obtain specimen by masturbation. **Do not use a condom, other containers or any form of lubricant.**
- Collect the entire specimen into a clear, sterile, plastic yellow-top container.
- **Write your surname, first name, date of birth and the date/time of collection on the container label.**
- **Keep the specimen close to your body from the time of collection until delivery to the lab to maintain the appropriate temperature. Do not chill or heat.**

Delivery

- Return the specimen and request form directly to your nearest approved drop-off location within 1 hour of collection for urgent processing.
- **The sample must reach the laboratory within 1 hour of collection.**
Please scan QR code for current locations and hours for drop-off. Also please note to call prior to confirm.
