

It's time to find your way to better health.

Haven't been to your GP in a while?

Below is a helpful list of things you might want to discuss with your doctor.

Do you have any new health symptoms that are concerning you? For example:

- Fatigue
- Change of appetite
- Shortness of breath
- Lightheadedness
- Faster heart rate
- New/changed skin lesion

Changes like these can be important early warning signs for something more serious.

Are you due for any blood tests, cancer screenings or chronic illness check-ups? For example:

- 6-monthly diabetes monitoring
- Cervical cancer screening
- Bowel cancer screening
- Skin cancer check
- Cholesterol
- Blood glucose
- Mammogram
- STI testing

Get the certainty you need.
